ArcSight ESM Security Analyst

Course description

This course provides you with the knowledge required to monitor security events using the ArcSight Console. By experiencing a day in the life of Adam, a security analyst, you will also learn how to build or use standard ArcSight ESM content to find and correlate event information, and to perform various actions. These actions include notifying stakeholders, analyzing event data graphically, reporting on security incidents within your security environment, and escalating security incidents through the ArcSight ESM workflow for further analysis and remediation.

Course ID	00430032
