

HP ASE - Data Center and Cloud Architect V1 (inactive)

This certification validates that you can plan, design, and manage a holistic platform for reliable, scalable and secure shared services in a converged infrastructure and cloud environment. It verifies you have the skills needed to help lead the transformation of data centers from rigid, siloed architectures to adaptive, converged IT. It also verifies you can utilize appropriate cloud solutions across private, managed, public, and hybrid cloud that meet today's business challenges and future needs. Earning this certification demonstrates you can do the following:

- Explain and position the HP Helion data center and cloud strategy and solutions
- Determine customer technical and business requirements and design the best solution
- Lead Proof of Concept activities
- Identify HP's strengths over other vendor solutions

Why earn this certification?

- To fill the skills niche that businesses are looking for as they move to take advantage of the new style of IT incorporating the latest advances and opportunities for cloud and data center convergence
- To advance your knowledge of the complete suite of HP Helion products, solutions and services
- To become a more valuable asset to your team with validated core competencies to effectively design an integrated, agile and secure cloud solution
- To enhance your career advancement and job satisfaction as a certified expert
- To be part of a community of fellow certified professionals for ongoing synergy and growth

Candidate

Typical candidates are IT professionals who plan, design or manage data centers. The ideal candidate has foundational HP and 3rd party server, storage, networking, operating system, virtualization, security, and management product knowledge, has experience with architecting IT solutions, and has worked in the IT industry for at least 3-5 years.

Skill level

Expert
