

# HP ATA - Connected Devices V1

This certification validates that you understand a customer's business objectives and can design, implement, and support IT solutions in small to medium size businesses. This certification validates that you can do the following:

- Install, configure, and upgrade client solutions
- Troubleshoot
- Perform repair and replacement procedures

HP Institute is designed for you. Learn industry standard client technologies. These include how to plan and design common desktop virtualization, mobile computing, traditional PCs, thin clients, and cloud infrastructures. You will also learn how to perform version control, backups and maintenance tasks.

## Why earn this certification?

- To learn valuable technical skills and the relevant business context.
- To get practical experience with HP products and industry standard technologies.
- To gain higher job and earning potential through an industry recognized certification that validates your job readiness.

## Candidate

Typical candidates are students who want knowledge of industry standard IT client technologies that are relevant in today's small to medium size business environment. Students who aspire to these key IT roles: desktop support, helpdesk support, client systems administrator, systems engineer, technical support engineer, and connected devices solution architect.

## Skill level
