

HP ATA - Cloud V1

This certification validates that you understand a customer's business objectives and can optimize, troubleshoot, and support end-to-end IT cloud solution designs and deployment. This includes on premises, hosted, and cloud solutions for small to medium size businesses. HP Institute is designed for you. Learn industry standard cloud and virtualization technologies. Learn how to support disaster recovery plans, install, configure, and upgrade servers, storage, data, networks, clients, applications and users in both new and existing environments.

Why earn this certification?

- To learn valuable technical skills and the relevant business context.
- To get practical experience with HP products and industry standard technologies.
- To gain higher job and earning potential through an industry recognized certification that validates your job readiness.

Candidate

Typical candidates are students who want knowledge of industry standard IT and cloud technologies relevant in today's small to medium size business environment. Students who aspire to these key IT roles: IT solutions architect, systems engineer, technical support engineer, system administrator, network management center, and help desk support.

Skill level

Associate
