

HP ATP - Converged Infrastructure Administrator V1

This certification validates you can administer and manage an entire data center based on the HP Converged Infrastructure solution. It also validates you can administer and manage its individual technologies such as BladeSystem servers, virtualization, storage, software, networking and security. The certification verifies you can select and use the appropriate tools to monitor the health and utilization of the IT environment.

Why earn this certification?

- To increase your value to your organization by certifying that you can effectively manage and administer a datacenter based on a Converged Infrastructure.
- To become an HP ExpertOne certified professional and enjoy benefits such as access to converged infrastructure technical tools, resources and HP engineering experts.
- To be part of a community of fellow certified professionals for ongoing synergy and growth.
- To enhance your career advancement and job satisfaction as a certified expert.

Candidate

Typical candidates for this certification are IT professionals who provide administrative and operational tasks for an HP Converged Infrastructure environment. These tasks include “infrastructure as a service” and traditional IT services. Candidates should have management experience with blade servers, virtualized environments and converged infrastructure components: networking, storage and servers.
