

HP ATP - Data Protector v8

This certification validates that you can configure and manage HP Data Protector software. It assesses thorough understanding of backup and recovery concepts as implemented by the HP Data Protector software. It also verifies indepth acquaintance with the functionality of the software and its application to typical storage implementations.

Why earn this certification?

- To help organizations make the decision on how and where to protect data, whether it is on-premise, in the cloud, or with a hybrid strategy
- To bring to the IT storage team the ability to refine recovery point and time objectives based on the criticality of the information being protected
- To jump start your career as a storage administrator with a leading vendor certification
- To complement and enhance your recognized storage administration skills and role with vendor specific subject matter expertise

Candidate

Typical candidates for this certification are storage and systems administrators (with a thorough understanding of backup and recovery concepts), who are already using or looking into adopting HP Data Protector software.
