

Implementing HP Network Infrastructure Security, Rev. 10.41

Course description

This course is designed to prepare you to configure, troubleshoot and implement HP Networking security features used for network protection. Network protection features on both the A-Series and E-Series devices are explored.

Who should attend

This course is designed for HP Networking channel partner systems engineers, network engineers and network specialists who design and deploy wired network solutions. It is also appropriate for HP end user network engineers.

Prerequisites

Recommended:

HP E-Series Networking Technologies and HP Networking Infrastructure Security Technologies or equivalent knowledge.

For complete prerequisites and requirements to achieve any of the related certifications or upgrade paths, see the certification description on the HP ExpertOne website.

Objectives

After completing this course, you should be able to do the following:

- Configure, troubleshoot and implement HP Networking security features
