

Asset Manager 9.x Software Essentials

Course description

This course provides the essential skills and knowledge needed to configure, deploy, and use Asset Manager 9.40 to successfully implement an asset management solution in an enterprise-level business or large organization.

The class consists of approximately 50% lecture and 50% hands-on lab exercises. The hands on lab exercises use version 9.4 of the software.

Who should attend

This course is designed for users who are new to HP Asset Manager.

Customers: Administrators, developers, web developers, and managers who are managing the Asset Manager 9.x product

Channel Partners and HP C&I

Personnel: Consultants, system architects, integrators, and planners who help customers with Asset Manager 9.x implementations

HP Engineers: HP personnel who provide pre-sales and post-sales support for Asset Manager 9.x

Prerequisites

- Experience with Windows
- Experience with operating systems
- Knowledge of relational databases and database terminology.

For complete prerequisites and requirements to achieve any of the related certifications or upgrade paths, see the certification description on the HP ExpertOne website.
