

ArcSight ESM Security Analyst

Course description

This course provides you with the knowledge required to monitor security events using the ArcSight Console. By experiencing a day in the life of Adam, a security analyst, you will also learn how to build or use standard ArcSight ESM content to find and correlate event information, and to perform various actions. These actions include notifying stakeholders, analyzing event data graphically, reporting on security incidents within your security environment, and escalating security incidents through the ArcSight ESM workflow for further analysis and remediation.

Who should attend

Anyone who needs to monitor security events using the ArcSight Console.

Prerequisites

For complete prerequisites and requirements to achieve any of the related certifications or upgrade paths, see the certification description on the HP ExpertOne website.

Objectives

After completing this course, you should be able to do the following:

- Monitor security events using the ArcSight Console
- Build or use standard ArcSight ESM content to find and correlate event information, and to perform various actions.
