

Designing HP Backup Solutions, Rev. 14.21

Course description

This course teaches you to plan and design Enterprise Backup Solutions, and includes the benefits of Enterprise Backup Solutions, the identification of the components of a solution, and the understanding of how everything works together to provide customers with a complete network backup storage solution. This course will provide you with a competency level of understanding of the HP StoreOnce B6000 Backup System and also includes StoreOnce Best Practices, Configuration Guidelines and recommended configurations. It contains new product information updates for the HP Converged Storage platforms as well as new and updated Storage Sizing and Configuration lab exercises for HP 3PAR StoreServ, HP StoreVirtual and HP StoreOnce product platforms.

Who should attend

The ideal candidate is a presales professional who provides the technical support needed during the planning and design of HP small to medium business (SMB) and enterprise storage products and solutions.

This training is important for a channel partner organization and members of an HP sales team looking to increase its sales of HP storage solutions. Individual customers who are members of an internal purchasing team defining business needs and proposing solutions within an organization would also find value in this training.

Prerequisites

For complete prerequisites and requirements to achieve any of the related certifications or upgrade paths, see the certification description on the HP ExpertOne website.

Objectives

After completing this course, you should be able to do the following:

- Explain the fundamental architectures and technologies of Enterprise Backup Solutions
- Describe HP Backup products and solutions
- Identify the customer's backup requirements
- Design, validate and propose a solution
- Understand the HP Enterprise Backup vision, strategy, products and solutions
- Plan and Design an Enterprise Backup Solution
