

Installation and Support for HP StoreVirtual Solutions Rev.13.43

Course description

This course covers the installation and configuration as well as basic troubleshooting of HP StoreVirtual P4000 storage systems. This includes iSCSI and FC SAN physical and VSA environments, Snapshots, Remote Copy, MPIO, Multi-Site HA & DR as well as StoreVirtual Firmware upgrade scenarios, necessary to determine and provide solutions to solve problems. This course is designed to enable engineers to provide hardware and escalation support on behalf of the customer to technical support when it is deemed that the problem is complex or interoperability related.

New items include the following:

Portfolio Update to HP StoreVirtual Gen3

Update to Lefthand OS 10.5

VSA 2.0

Networking, Fibre Channel Best Practices

Extended Troubleshooting

Course ID	00824548

Who should attend

Technical professionals looking for technical expertise and experience on HP StoreVirtual 4000 SAN who must be able to distill a problem down to an installation, configuration or interoperability problem. Their job role includes the ability to duplicate the reported problem, isolate it and provide test results, log files and environment information to Partner Support for escalation.

Prerequisites

Recommended :

- HP Storage and Converged Infrastructure Portfolio
- StoreVirtual Architecture, HP Gen8 Basics incl. HP ILO Management (Active Health, Intelligent Provisioning)
- iSCSI, Networking, Multi-pathing, Storage Performance Monitoring & SAN Know-How
- Windows, VMWare vSphere 5.x Administration and Troubleshooting
- Management Tools (HP-SIM, Insight Control, Insight Remote Support)

For complete prerequisites and requirements to achieve any of the related certifications or upgrade paths, see the certification description on the HP ExpertOne website.

Objectives

After completing this course, you should be able to do the following:

- Describe, Perform, Understand, Identify, Setup and configure, Implement and Troubleshoot HP Store Virtual P4000 solutions, including VSA 2.0 Deployments.
- Perform upgrades on Single- or/and Multi-site HA Clusters.
- Adapt Best Practices about Networking & Fibre Channel SAN environments, Snapshots, Remote Copy, Performance Monitoring and Snap Clones.
