

Building Server Solutions, Rev.14.21

Course description

This course provides a technical introduction to HP ProLiant server products, including rack, tower and BladeSystem solutions. HP products discussed include ProLiant ML, DL, SL, and BL servers and associated products.

Who should attend

Consultants, sales engineers, presales engineers, administrators, installation technicians, and support technicians who will work with HP ProLiant rack, tower and BladeSystem servers.

Prerequisites

HP recommends that participants take the 'HP Innovations for Today's IT Infrastructure' WBT course before attending this course.

For complete prerequisites and requirements to achieve any of the related certifications or upgrade paths, see the certification description on the HP ExpertOne website.

Objectives

After completing this course, you should be able to do the following:

- Understand entry level server design, installation, startup, and administration
- Understand how to use related HP products, tools and utilities that will help you with server design, installation, startup and administration.
