

Selling HP Automation and Cloud Management Software Solutions

Exam description

This exam verifies that you know the market trends, business drivers, and customer challenges associated with the high-level Automation and Cloud Management space.

It validates that you can articulate how HP addresses these challenges through compelling value propositions that deliver business and IT value, recognize the market demands and challenges associated with Tasks Automation, Process Orchestration, and Transforming Service Delivery and are able to explain how HP addresses these demands and challenges.

Who should take this exam?

This exam is for sales professionals who want to validate that they have attained the level of knowledge required to sell HP Automation and Cloud Management software solutions. They look forward to assessing and improving their capabilities in understanding of customers; qualifying and validating opportunities; and developing and proposing solutions in the Automation and Cloud Management space. It is recommended that you have six months of experience in positioning and selling IT Management software solutions.

Exam contents

This exam has 51 questions. Here are types of questions to expect:

- Multiple choice (multiple responses)

Tips for taking this exam

This exam assess whether you have the knowledge and skills that are required to sell HP Automation and Cloud Management software solutions. Therefore, many test items relate to the HP Customer Driven Sales Methodology (CDSM) that defines the standard structure and framework to support the HP selling process

Take the time to read the entire question and consider all of the options carefully *before* you answer. Make sure to select the answer that correctly responds to the question that is asked — not simply an answer that includes some correct information.

If the question asks for more than one answer, remember to select each correct answer. You will not receive partial credit for a partially correct answer.

Objectives

This exam validates that you can successfully perform the following:
