

Selling HP Autonomy Data Protection Solutions

Exam description

This exam verifies that you know the market trends, business drivers, and customer challenges associated with the high-level data protection. It validates that you can articulate how HP addresses these challenges, through compelling value propositions that deliver business and IT value, recognize the market demands and challenges specific to the backup and recovery of an enterprise data center, of remote and branch office data and mobile and personal data, and are able to explain how HP addresses these demands and challenges.

Who should take this exam?

This exam is for sales professionals who want to validate that they have attained the level of knowledge required to sell HP Autonomy Data Protection solutions. They look forward to assessing and improving their capabilities in understanding of customers, qualifying and validating opportunities and developing and proposing solutions in the Data Protection space. It is recommended that you have six months of experience in positioning and selling data protection, backup and recovery solutions.

Exam contents

This exam has 40 questions. Here are types of questions to expect:

- Multiple choice (multiple responses)
- Multiple choice (single response)

Tips for taking this exam

This exam assess whether you have the knowledge and skills needed to position, promote and propose in house (Enterprise) Data Protection and Cloud or Service based (SaaS) HP Autonomy Data Protection solutions. Therefore, many test items may present a scenario which outlines a particular customer pain point or challenge.

Take the time to read the entire question and consider all of the options carefully before you answer. If the question indicates that it features an exhibit, study the exhibit and reread the question. Make sure to select the answer that correctly responds to the question that is asked — not simply an answer that includes some correct information. If the question asks for more than one answer, remember to select each correct answer. You will not receive partial credit for a partially correct answer.

Supporting courses

These recommended courses help you prepare for the exam:

- [00909644: HP Data Protector - Granular Recovery Overview](#)
- [00909642: HP Data Protector Overview](#)
