

Certification Data Sheet

HP Certified Professional Program

Certification: AIS – HP Converged Infrastructure [2009]

Availability: 15 October 2009

Overview:

This certification, previously known as AIS – *Specialty in Insight Dynamics* – VSE, brings together all the technical training for the integration professional to learn how to design, plan and implement consolidated infrastructure solutions built on the HP BladeSystem Matrix platform.

Target Audience:

HP partner, employee or customer technical professionals who design, implement or support solutions based on BladeSystem Matrix.

Summary of Requirements:

The candidate for this certification must hold one prerequisite certification and pass one core exam.

Prerequisite:

The candidate must hold at least one of the following certifications:

- AIS – HP BladeSystem [2009] **–or–**
- AIS – HP BladeSystem [2007]

Core Requirements:

Exam HPO-D06: Implementing HP Converged Infrastructure Solutions

Recommended Training:

Course 00120161: HP Converged Infrastructure v 9.31
Delivery Format: Instructor-led training (ILT)
Typical Duration: 5 days

Superseded Certification and Upgrade Path:

AIS – HP Converged Infrastructure [2009] replaces the certification AIS – *Specialty in Insight Dynamics* – VSE. The latter certification cannot be attained after 15 March 2010. The upgrade path consists of taking the revised course and the new core exam.

Why earn this certification:

The AIS – HP Converged Infrastructure [2009] certification prepares the technical integration professional to plan, design and implement solutions based on BladeSystem Matrix. The HP BladeSystem Matrix is an integrated IT infrastructure platform designed to simplify the deployment of applications and business services by delivering IT capacity through pools of readily deployed resources. The goal of Matrix is to optimize IT capacity across the customer's physical and virtual environments while ensuring predictable delivery and service levels. BladeSystem Matrix integrates proven HP BladeSystem technologies including:

- BladeSystem c-Class infrastructure.
- ProLiant and Integrity server blades.
- Virtual Connect.
- Insight Dynamics - VSE and its Insight Orchestration and Insight Recovery extensions.
- Central management server.

The platform is ideal for simplifying consolidation initiatives, high availability protection and rapid deployment to production environments. BladeSystem Matrix is expected to be on a steep growth curve in the coming years. The technical professional who holds the AIS – HP Converged Infrastructure [2009] certification is in a position to support growing customer demands for the platform.
